Silicon Vikings – Networking Works Workshop – Welcome and Introduction

InnoVisionDenmark Key Points

InnoVisionDenmark and many other organisations work together on how to make Denmark more attractive and more successful on:

- Attracting talents and start-ups
- Up-scaling – to grow the start-ups more frequent, faster and better

The research done points at:

- More focus on competences – if we have “the right people with the right competences”, the chances for success increases
- Extending the network – we need to include/attract more “global talent”

InnoVisionDenmark and partners will therefore work on:

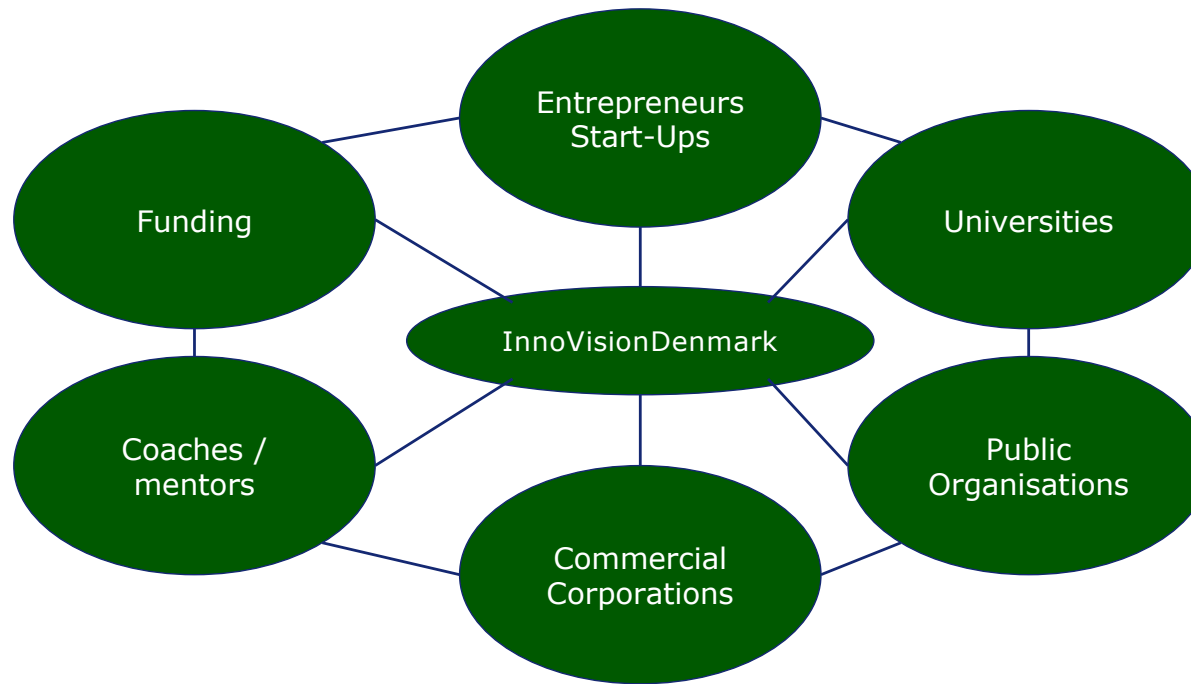

- Digitalisation of the networks/competences – if we can identify competences needed, what we have and what we need to add, then we are an important step in the right direction
- Events, to network, build relations and transfer knowledge

Many thanks for joining.

If you have comments or questions, feel free to email sandeep@sander.dk
